Sustainable Hydropower Development Alternatives for the Mekong: Maintaining the Flows that Nourish Life
Sambor Hydropower Project in the Lower Mekong Basin
Sambor Dam
Comparison – Original Design v. NHI Alternative 7
Sambor 7a
Lower Se San II Hydropower Project

Located at the confluence of two of the largest tributaries that pour into the Mekong mainstream just above the Tonle Sap Lake and Delta.
Solar Augmentation of Existing Hydro

⇒ Challenge: Show that the “No-Dam” alternative is comparable or superior to new hydro with respect to:

✓ Cost
✓ Reliability
✓ Output
✓ Timeline for Deployment
✓ Financial Risk Avoidance
